The Trousers measurements which go up in waist sizes correspond with the other measurements on the chart. For Off the Peg the waist size will decipher your seat, inside leg and outside leg.

Measuring the Waist

Place the tape around the part of the waist where you wish to wear the trousers.

Measuring the Seat

Standing with your feet together, run the tape around the widest part of the seat/hips. The tape must run smoothly up and down, neither too loose nor too tight.

Measuring the Inside Leg

Hold the measuring tape high up into the crotch position then run the tape down the inside leg to the desired length.

Measuring the Outside Leg

Find where you would like the waistband to sit and measure from this point down the outside leg to the desired length.
